

# 2017 Texas Wine Grape Varieties

Southern Plains Regional Field Office · Post Office Box 70, Austin, Texas 78767 · 800-626-3142 · www.nass.usda.gov

The Southern Plains Regional Field Office of USDA-NASS, in collaboration with the Texas Wine Grape Growers Association conducted the Grape Variety Inquiry for the 2017 production year. Variety data was collected from growers on acreage, production, and price; by variety.

The population for the Wine Grape Variety Survey was drawn from the USDA-NASS Sampling Frame of known grape producers. This population was derived from an extensive review of both State and regional grower association lists, Extension Service lists, and the USDA-NASS Sampling Frame. The original sample mail-out included 993 records of known, or potential, grape acres. One additional record was added after the first mailing for a total of 994 samples. Each record was assigned to one of five strata based on known or expected grape acres.

### Distinct Wine Grape Growing Regions of Texas

Region Name	Bearing Acres	Total Production Tons
Texas High Plains and Panhandle	2,685	7,817
North Texas (DFW)	398	777
Southeast Texas and Gulf Coast	305	455
West Texas	395	1,293
Hill Country	758	1,321
<b>Texas</b>	<b>4,541</b>	<b>11,660</b>

The overall response yielded 810 useable reports from the 994 total sample, or 81.5%. Of the useable reports, 66.8% reporting growing grapes, 33.2% did not have any grapes. By mode of data collection, 46.7% of useable reports were received by mail, 44.6% were received by telephone interview, and 2.5% were acquired by personal, face-to-face interview. The remaining usable reports were acquired from research resolving incorrect mailing addresses or bad telephone numbers.

Prior to summarization, records that were originally assigned to the 'unknown' strata were reassigned to the appropriate strata based on reported grape acres. This post-stratification reduced the impact of unknown or incorrect sampling data on final non-response weights.

The Southern Plains Regional Field Office appreciates all producer response to this survey, as producer-level data is the foundation of this report.

We would like to acknowledge the cooperation of all Texas Wine and Grape Associations for their assistance, as well as their promotional efforts with encouraging response. We would especially like to acknowledge the Texas Wine and Grape Growers Association for providing the funding that made this project possible.

## Texas High Plains and Panhandle - 2017

Variety	Bearing Acres	Non-Bearing Acres	Production Tons	Yield Tons/Acre
Cabernet Sauvignon	390.0	77.0	870.0	2.2
Tempranillo	200.0	11.0	600.0	3.0

<b>Total <sup>2</sup></b>	<b>4,541</b>	<b>1,085</b>	<b>11,660</b>	<b>2.6</b>	<b>18,947,500</b>	<b>1,625</b>

<sup>1</sup> Varieties that could not be published to prevent disclosure of individual information, as well as varieties that were not identified in the survey and are included in the "Other/Unknown" category.

<sup>2</sup> Totals may not add due to rounding.

<sup>3</sup> Value of Production for each variety is calculated by applying the average price for sales reported on the survey to the total production for that variety. If a variety had too few reports of sales to establish an average price for that variety, then the price and value of production for that variety has been included in the average price and total value for the "Other / Unknown" category.

<sup>4</sup> Varieties that had no sales reported are represented by "N/A" in the table.
